## VeriFone 3600

## VeriFone 3600 - Features

- Mobile Chip & PIN Payment terminal with Semi-integrated EFT
- EMV Level 1 and Level 2 certification using Ocius / VeriFone Terminal software
- Trouble-free built-in Printer with paper rolls that simply “drop-in” virtually eliminating paper jams
- Light Slim-line design
- Use of Hosted Payment Engine, elevating any requirement to support an EFT payment server and no requirement for overnight polling of funds
- Ability to pass an input file containing transaction value, type and transaction modifier
- Ability to take part or full payment for a bill logged with the terminal
- Comprehensive and Advanced Reporting available from Terminal and Head Office using TMIS Management System
- Memory of 1.5, 3 and 4 Mbytes handling the most complex transactions and value-added applications
- Wi-Fi or GPRS connectivity available
- The only wireless Chip & PIN device suitable offering an integrated link for the hospitality market
