VeriFone 3750 - Features

VeriFone 3750 - Features

- Chip & PIN Payment terminal with Semi-integrated EFT
- EMV Level 1 and Level 2 certification using Ocius VeriFone Terminal software
- Trouble-free built-in Printer with paper rolls that simply “drop-in” virtually eliminating paper jams
- Colourful faceplates or “Skins” that can be customized to extend branding power to the Point of Sale or Retail environment
- Use of Hosted Payment Engine, elevating any requirement to support an EFT payment server and no requirement for overnight polling of funds
- Ability to pass an input file containing transaction value, type and transaction modifier
- Comprehensive and Advanced Reporting available from Terminal and Head Office using TMIS Management System
- Memory of 1.5, 3 and 4 Mbytes handling the most complex transactions and value-added applications
- Ethernet communications module for easy access to any IP-based network
- Forward thinking solution suitable for use today and tomorrow
